Film and TV production support

Dear Production Manager or Production Coordinator,

BlackTor works alongside film and television production teams across the South West and throughout the UK. We provide discreet support for cast, presenters, contributors and visiting guests, with arrangements built around call times and the production schedule.

We can coordinate airport or rail meet-and-greet, chauffeur transfers and personal concierge, and accompany people between accommodation, filming locations and appearances. Discreet close protection is available where the assignment calls for it.

We also provide backwatch, stage and set security, and equipment protection. We agree the areas, timings and responsibilities with your production or location team, with overnight cover available where required.

Based in Plymouth, South Devon, we can support a single filming day, an extended shoot or a production working across several locations. I'd welcome a confidential conversation about your next project.

Kind regards,
James Charlesworth
