Private residence and estate security

Dear Homeowner, Estate Manager or Private Client Representative,

BlackTor provides discreet security for private homes and estates across the South West and throughout the UK. We work with owners, estate managers and household teams to arrange cover around the way the property is used.

We can provide security during periods of absence, owner visits and private gatherings. Support can include an agreed on-site presence, oversight of arrivals and departures, and liaison with household staff and approved contractors.

Before an assignment, we agree duties, timings, reporting and points of contact with the client or their representative. Where needed, we can discuss overnight cover or personal accompaniment as part of the wider brief.

Based in Plymouth, South Devon, BlackTor brings the discretion and professional etiquette of close protection to private household settings. I'd be happy to discuss your requirements in confidence.

Kind regards,
James Charlesworth
