PRIVATE TRACK WEEKEND SUPPORT

PROTECT · SECURE · ASSURE

Private support for your club’s next track weekend

Dear Club Organiser or Vehicle Owner,

I’m James Charlesworth, founder of BlackTor Protection Management. Based in Plymouth, South Devon, we provide discreet vehicle security, personal concierge and close protection for supercar owners and private motoring clubs across the UK.

For your next track day or driving weekend, we can support your members from departure to their return home. Members who prefer to drive their own cars can travel with a BlackTor team accompanying the group in a separate support vehicle. For those who prefer their cars to be delivered, we can arrange transport by enclosed vehicle or trailer and accompany the cars from collection to handover.

Along the way, we keep watch over vehicles during fuel and meal stops. At the hotel, we liaise with the venue to arrange parking and provide overnight security. At the circuit, we coordinate parking and paddock access and look after the cars while members enjoy the hospitality. We can also arrange refuelling and valeting, with any vehicle movements agreed with owners in advance.

For members who would like more personal support, we can arrange a dedicated concierge or discreet close protection tailored to their public profile, business commitments and privacy requirements.

If you have a track weekend or private driving event in the calendar, I’d welcome a brief conversation about your plans and would be happy to prepare a proposal for your club.

Kind regards,

James Charlesworth
